## ***Why Spider Law?***

### 1. Designed specially for Law Firms

Yes! The modules stated above are specially design for legal practice usage. Stop using the general accounting software, use Spider Law specialized accounting system today. You will feel the convenience and effectiveness our software brings to you as we understand your legal business.

### 2. Money Saving

Spider Law can helps you save money by:

- cutting down the usage of paper (cost saving and save the trees too)
- reducing the number of staffs you need to manage your files (cost saving)
- reducing the space for storage (no rental for storage space)

### 3. Time Saving and speedy

Spider Law makes it easier for you to track your document and case status. You can access all the information with few clicks away. As such, you don't have to spend time to locate your file anymore. When your clients call for file status, you may answer them without locating the physical files as long as your computer is in front of you. Time is gold.

### 4. Accuracy

Spider Law provides accuracy when handling the documents as we know how crucial it is to be accurate in legal practice especially when drafting agreements and sending out letter. Generate error free documents in minutes with powerful document templates which supports all popular word processors. (Human makes mistake but system won't.)

### 5. Increase Productivity

With Spider Law, now your staff can reduce their time spend on each file. Imagine if you save 10 minutes in a file how much of time you will save every month. By reducing the time spending in each file, your staff can have more time to provide better client service to your valuable clients.

### 6. Secure & Protected

Protect sensitive data with comprehensive security control on functional operation and menu access level. Your valuable data can be backup into your server too. This will make sure you never lose your file.
